Experience:

TEC Control Systems, inc.
Service Technician

Torrington, Connecticut
August 1999 to Present

- Execute daily operations of start-ups, service, inspections and repairs of fire alarm, security, CCTV, card access, nurse call, intercom and other electrical systems.
- Apply knowledge of design, construction procedures and building codes to assure satisfactory installations of fire alarm, security, CCTV, card access, nurse call, intercom and other electrical systems.
- Instrumental in the design and installation of fire alarm systems in two hospitals.
- Prepare information regarding design, specifications, materials, equipment, estimated costs and construction time.
- Prepare operating and maintenance manuals and reports.
- Responsible for all service requests in eastern Connecticut, Fishers Island, NY, and parts of Rhode Island and Massachusetts on a 24 hour basis.
- Supervise and train employees, schedule work hours, resolve conflicts, and make recommendations in salaries.

William W. Backus Hospital
Fire Systems Technician

Norwich, Connecticut
March 1989 to August 1999

- Responsible for inspecting, testing, maintenance and repair of all fire alarm and sprinkler systems.
- Researched all applicable codes and standards and applied them to assure compliance with OSHA, state and local agencies, insurance underwriter, and JCAHO.
- Designed, established and utilized computer technology to maintain all code related inspections and documentation.
- Consulted with engineers to determine functional requirements of new structure and renovation projects.
- Trained and managed the fire safety education of 1,300 employees and achieved significant improvements in their fire safety responsibilities.
- Successfully handled a fire alarm upgrade to satisfy a consent decree involving the Americans with Disabilities Act.
- Conducted periodic on-site observation of work during construction to monitor compliance with interim life safety policies.
- Structured and maintained a fire inspection program of all buildings and grounds.
- Prepared operating and maintenance manuals, studies and reports.
- Spearheaded an annual fire safety education fair.
- Directed activities of workers engaged in fire suppression.
- Responsible for conducting fire drills at regular intervals.
- Negotiated relocation of system components to resolve conflicts of co-location with other systems.
- Performed in the capacity of an electrician as required by demands placed on the maintenance department.

Champagne Electric, Inc.
Electrician

Plainfield, Connecticut
May 1988 to March 1989

- Commercial and residential electrical installations.
- Industrial controls and wiring.
- Bucket truck operation to facilitate installation of rooftop signage, industrial electrical installations and pole lighting maintenance.

General Dynamics, Electric Boat Division
Maintenance Electrician

Groton, Connecticut
January 1980 to May 1988

- Install, maintain and troubleshoot all phases of industrial electrical installations.
- Performed preventative maintenance on high voltage distribution equipment.
- Assisted designated personnel with the facility's fire alarm system modifications.
- Handled routine electrical maintenance duties as required.
- Often worked overtime on weekend off shifts to provide facility coverage in the event of electrical emergencies.
- Responded to emergency calls involving power outages, snow storms, hurricanes and other events as requested.
